SUMMARY

AI/ML-focused Computer Engineering student with experience building AI agents, ML applications, REST APIs, and cloud-backed systems using Python, LLMs, and AWS. Experienced in production application development, backend integration, and migrating applications from FlutterFlow to React Native/TypeScript.

EDUCATION

B.E. in Computer Engineering, NBN Sinhgad Technical Institutes Campus — July 2024 – Present
CGPA: 8.38/10

Diploma in Computer Technology, Sou. Venutai Chavan Polytechnic — June 2021 – June 2024
Percentage: 88.51%

SKILLS

Languages	Python, C++, Java, TypeScript
AI/ML	Machine Learning, LightGBM, Llama 3.1, ChatGPT API, Cerebras API, AI Agents
Backend	Node.js, Express, Flask, FastAPI, REST APIs, CRUD, API Integration
Cloud/Mobile	AWS, React Native, Firebase, Zustand, TanStack Query, GitHub Actions
Data/Production	Firestore, SQLite, Firebase Auth, FCM, Firebase Storage, Sentry, Crashlytics, Git

EXPERIENCE

AI Research & Backend Integration Intern — May 2026 – Present
Sectfit Healthtech Pvt. Ltd. — *Pune, Maharashtra, India*

- Developed AI agents and backend workflows for a health-tech application using REST APIs, Firebase, CRUD operations, and real-time data flows.
- Played a key role in migrating the production application from FlutterFlow to **React Native + TypeScript**, translating Figma/FlutterFlow designs into reusable TSX components.
- Implemented backend-connected application logic using **Node.js, Express, REST APIs, Firestore, Zustand, and TanStack Query**, focusing on performance, scalability, and optimization.

AWS Intern — Jan 2026 – Feb 2026
Sanyu Infotech Pvt. Ltd. — *Remote*

- Built an AI-powered cloud storage platform using Amazon Rekognition that auto-tags images by visual content, reducing image search time by ∼90%.
- Deployed the platform on AWS using EC2, S3, RDS, Auto Scaling, Load Balancing, and Elastic Beanstalk.

Android Developer Intern — June 2023 – July 2023
Infeanet Digital Marketing & Web Media — *Remote*

- Delivered 2 production Android apps: a multi-engine web browser and an AI chatbot integrating the ChatGPT API.
- Integrated REST APIs and Firebase for real-time data synchronization across both applications.

PROJECTS

Clickbait Clarifier – LightGBM + Llama 3.1 ensemble with Flask REST API detecting YouTube clickbait using metadata and transcripts; Chrome Extension delivers real-time ML inference. *(Feb 2026)*

Omnichat – Python CLI chat application using Cerebras API with real-time streaming, dynamic model switching, and persistent SQLite conversation history. *(Feb 2026)*

Retail POS & Invoice System – PySide6 desktop POS with SQLite, GST-compliant PDF invoices, inventory tracking, and analytics dashboards. *(May 2024)*
